MEMORANDUM FOR: Deputy Director (Plans)

SUBJECT: Position Ceilings for FY 1957 and FY 1958 to be Used in the Preparation of FY 1958 Budget and for Control of Current FY 1957 Operations.

1. The Operating Budget submitted for FY 1957 and the Preliminary Estimates for FY 1958 have been reviewed. As a matter of policy, it has not been possible to grant the increases in position ceilings which were requested for the various offices in your Area. The ceilings approved for your Area for use in the preparation of the FY 1958 budget and in the execution of the FY 1957 budget are as follows:

Fiscal Year 1957 .....  
Fiscal Year 1958 .....

25X1

2. The ceiling for FY 1957 is the number of positions which was originally presented for your Area to the Congress in connection with the approval of this current year's operation. It has been decided that a decrease will be made in FY 1958. The amount of the decrease assigned to the DD/P Area has been 43 positions, the reduction reflected in the above ceiling allowances.

3. The above allowances do not include provision for DD/I overseas positions. Since the DD/P Area administers these positions, for personnel reporting and control purposes, the above ceiling for FY 1957 is increased by 63, giving a total of

25X1

4. Although it has not been possible to grant position increases as requested, it is intended that the more recent requirements will be given adequate support within the allowances made. This, of course, will involve an evaluation of activities now being carried out and the dropping of those activities which are of lesser priority. I am particularly interested in the strengthening of our activities in the

5. These position ceilings are designed primarily to control the number of individuals on duty and provide for both military and civilians. It is the policy that the number of military and civilians on duty will remain at approximately the same ratio as heretofore. It will continue to be the policy to have Tables of Organizations and ceilings as nearly the same as is practical, bearing in mind that the ceilings are, in effect, a control of the on-duty strength rather than the number of positions on the T/O.
